

How to set up Live Photos on iPhone

Disclaimer

Disclaimer

Using the Live Photo wallpapers on your lock screen requires a separate app.

We will be using "intoLive" for this purpose.

Please read the intoLive instructions before use.

The outline below does not necessarily apply to every device.

Compatibility is not guaranteed.

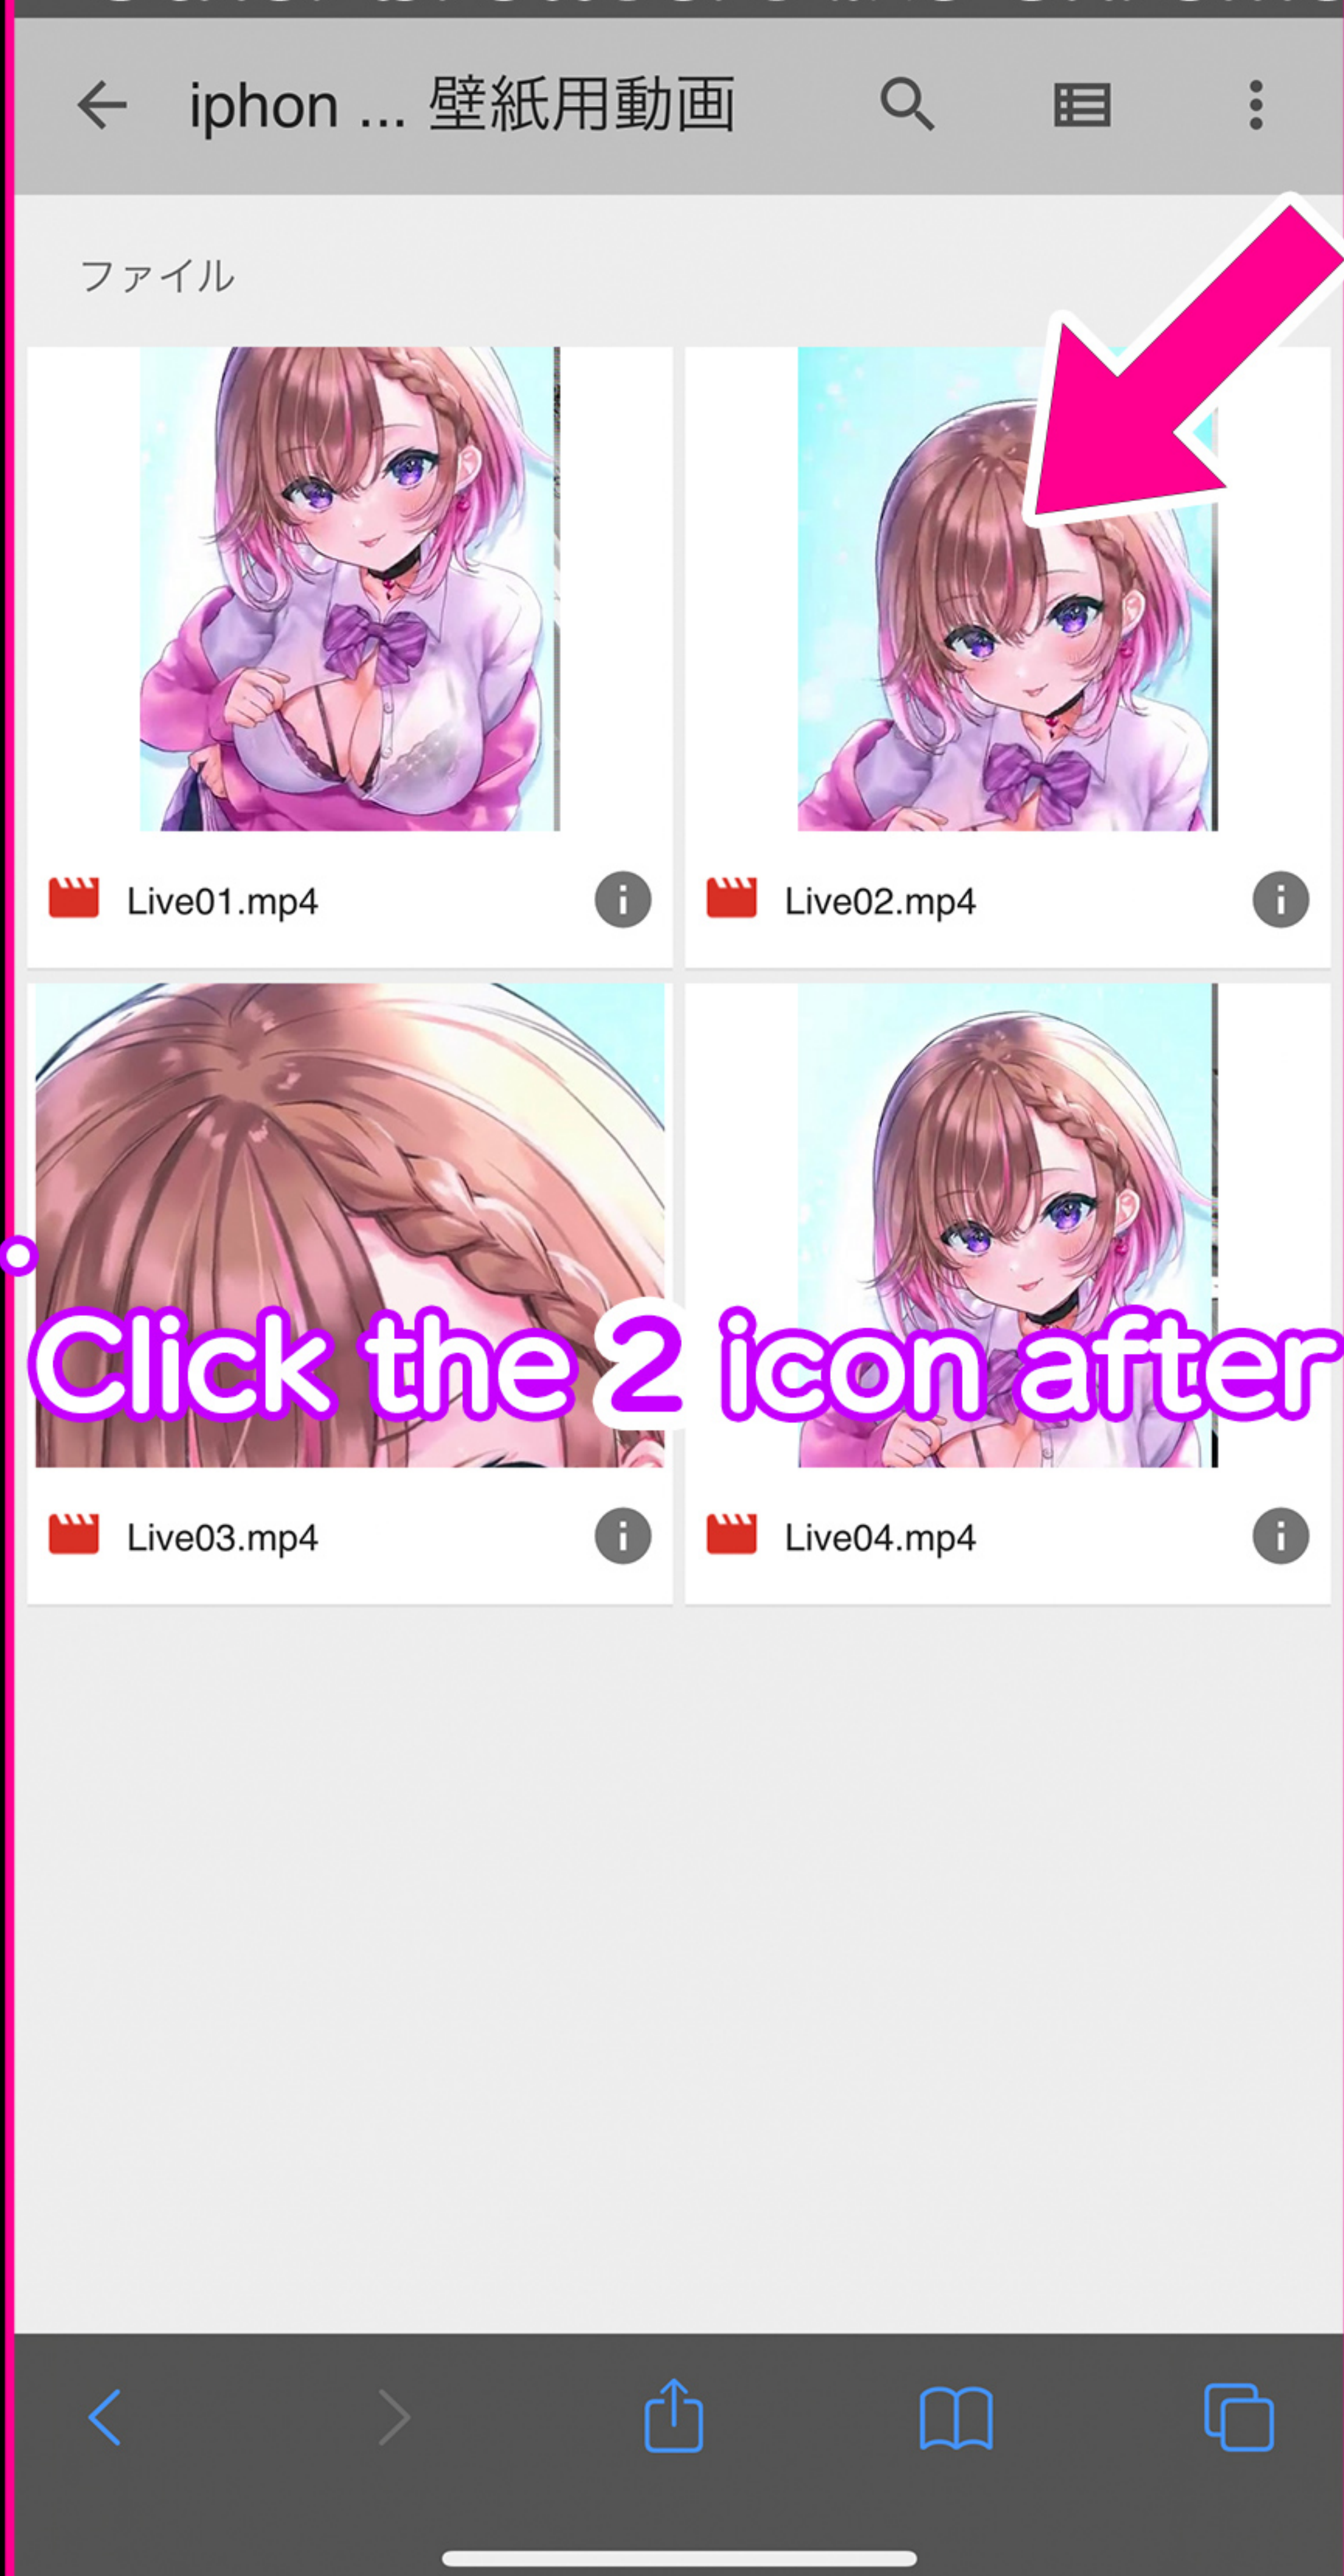

There are many apps for this same purpose, so use whichever works for you.

1) Transferring Live Photo data to intoLive

1.

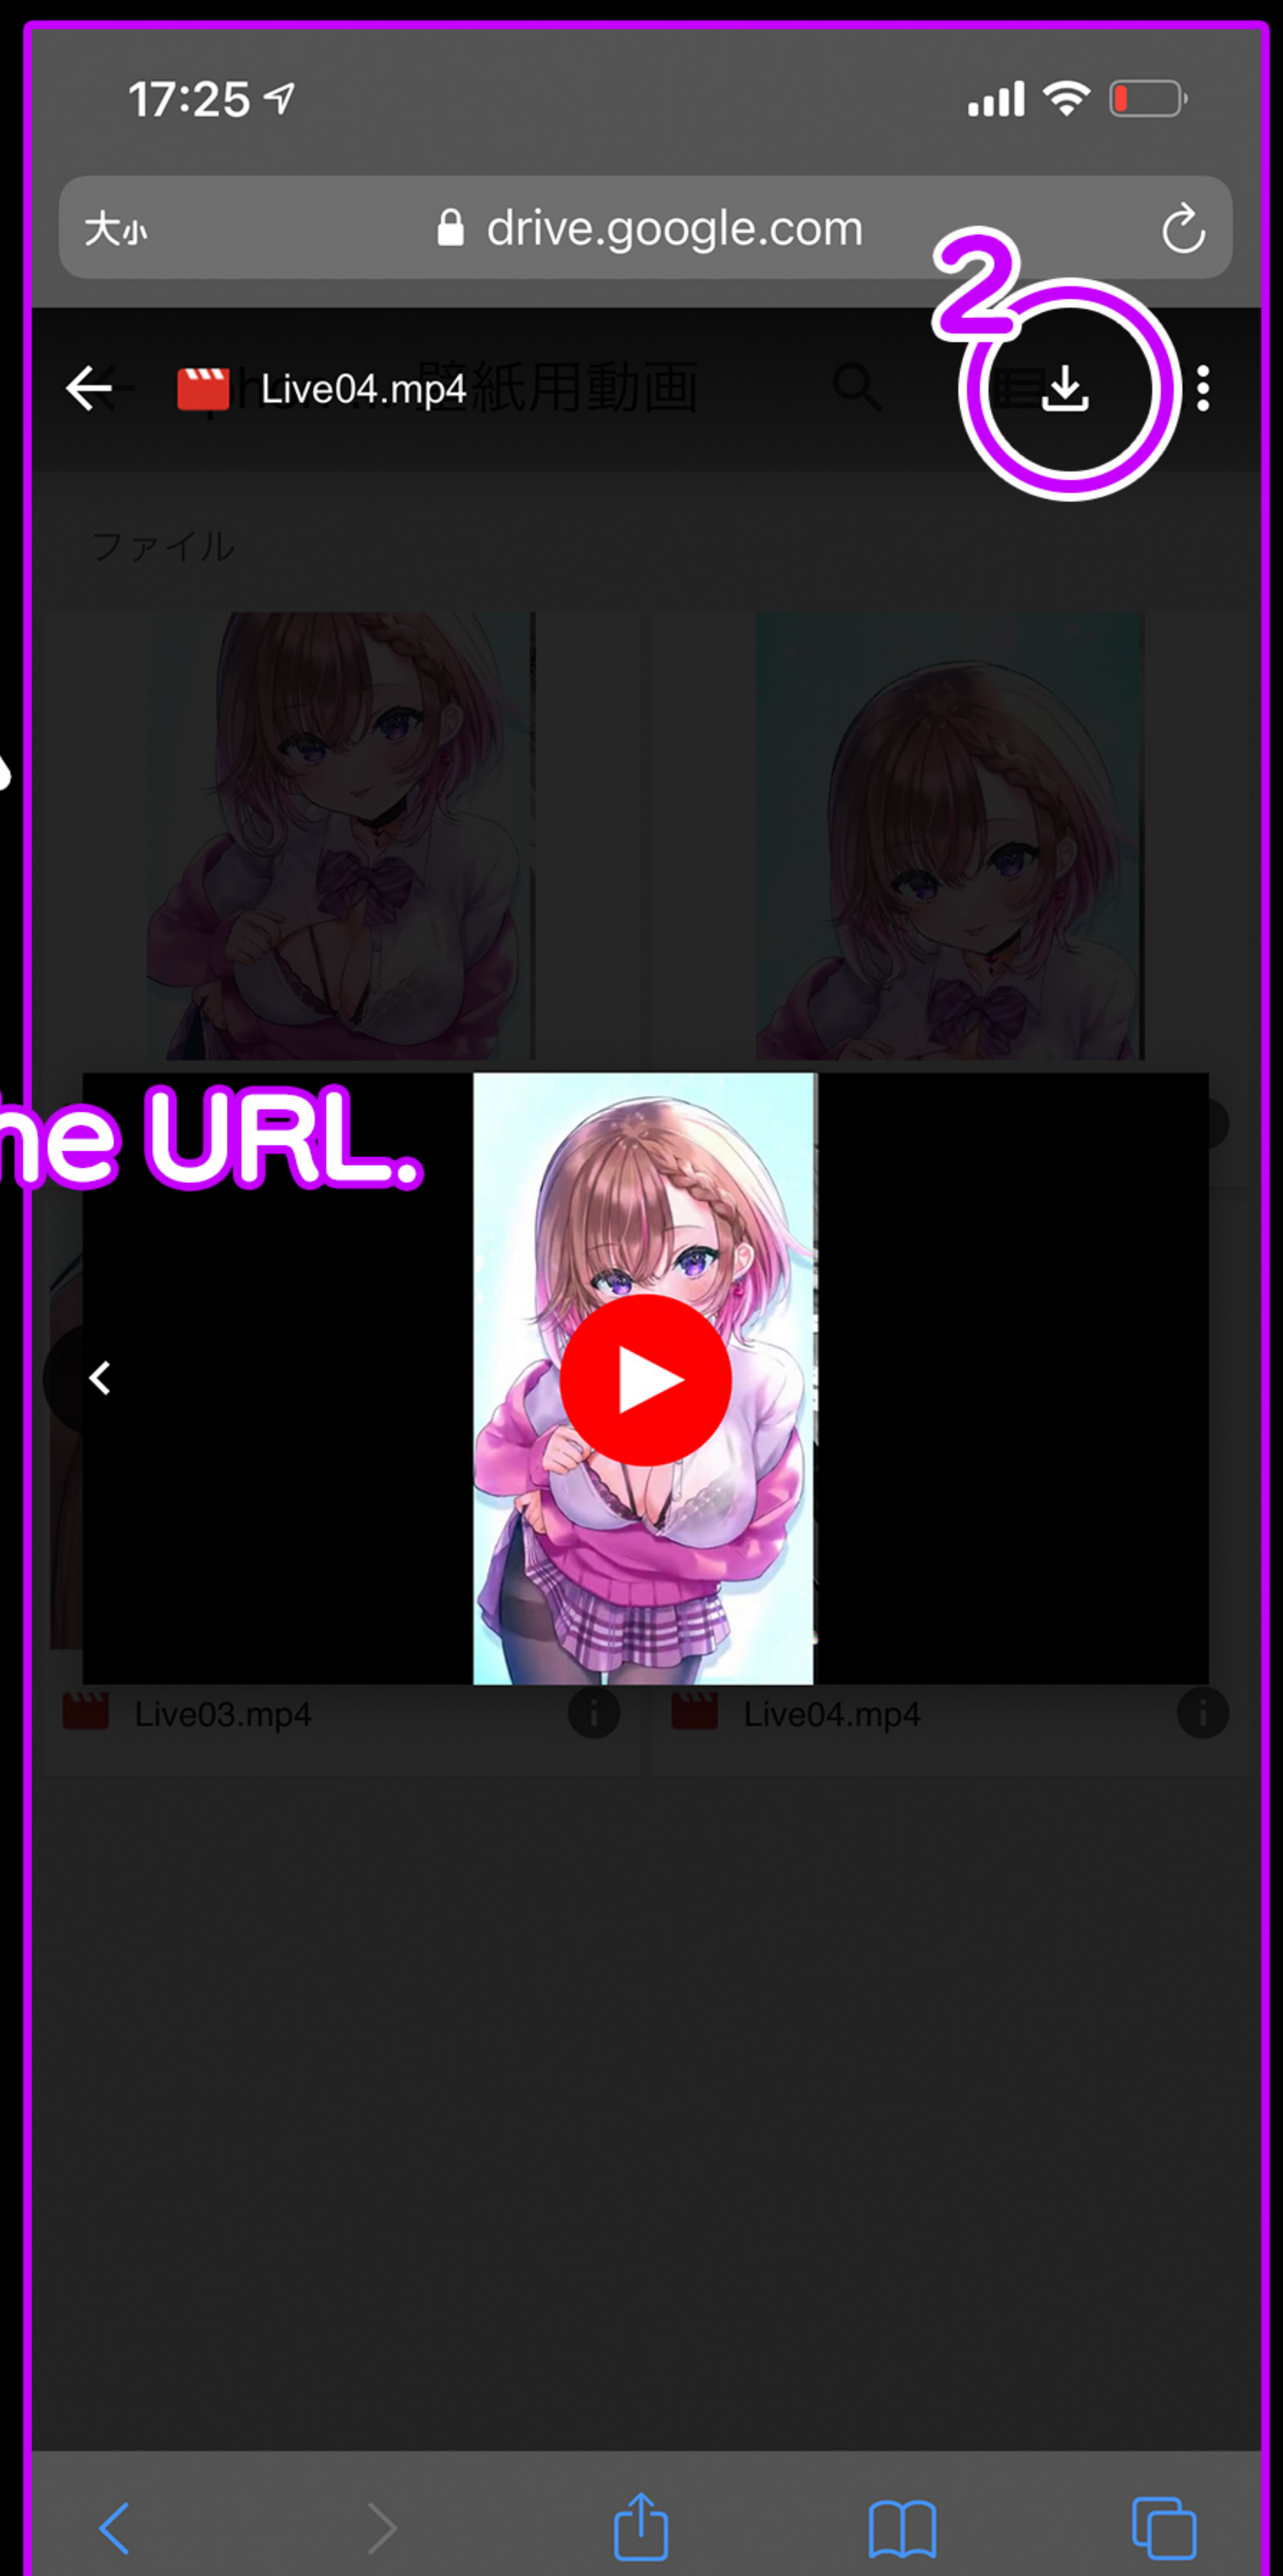

Open the download URL in Safari, then select the video.

*Other browsers like Chrome will not allow data transfer.

2.

Click the 2 icon after accessing the URL.

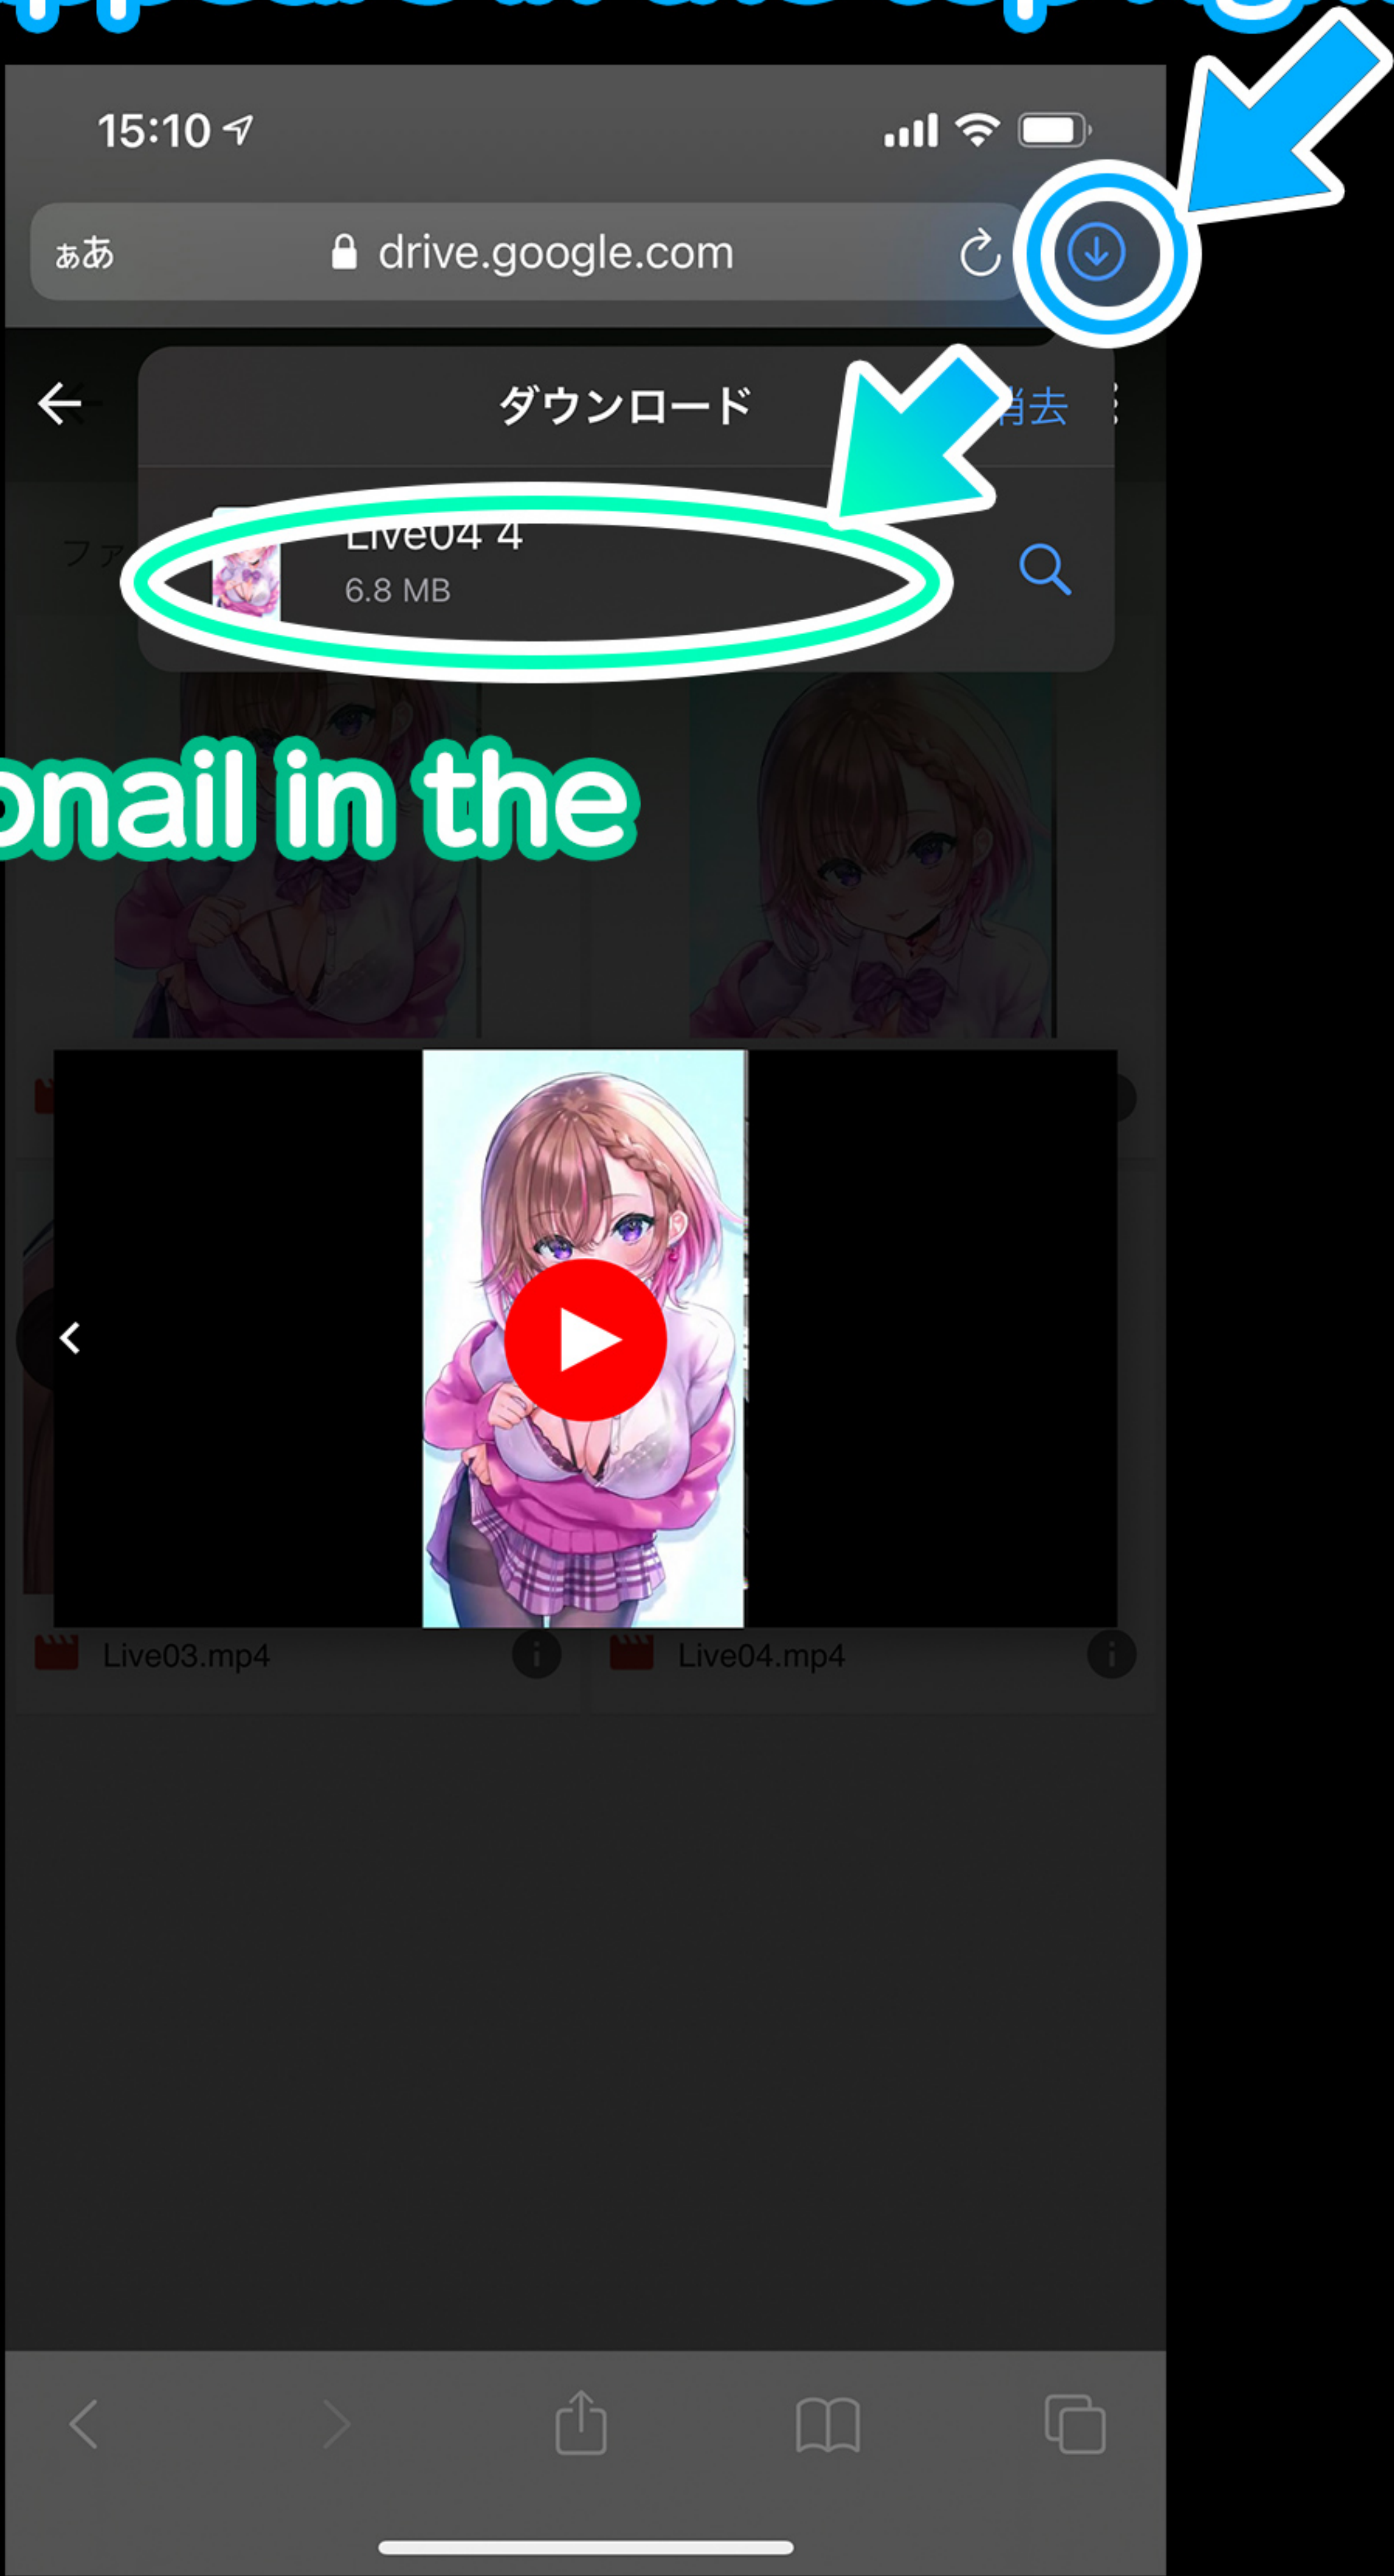

1) Transferring Live Photo data to intoLive

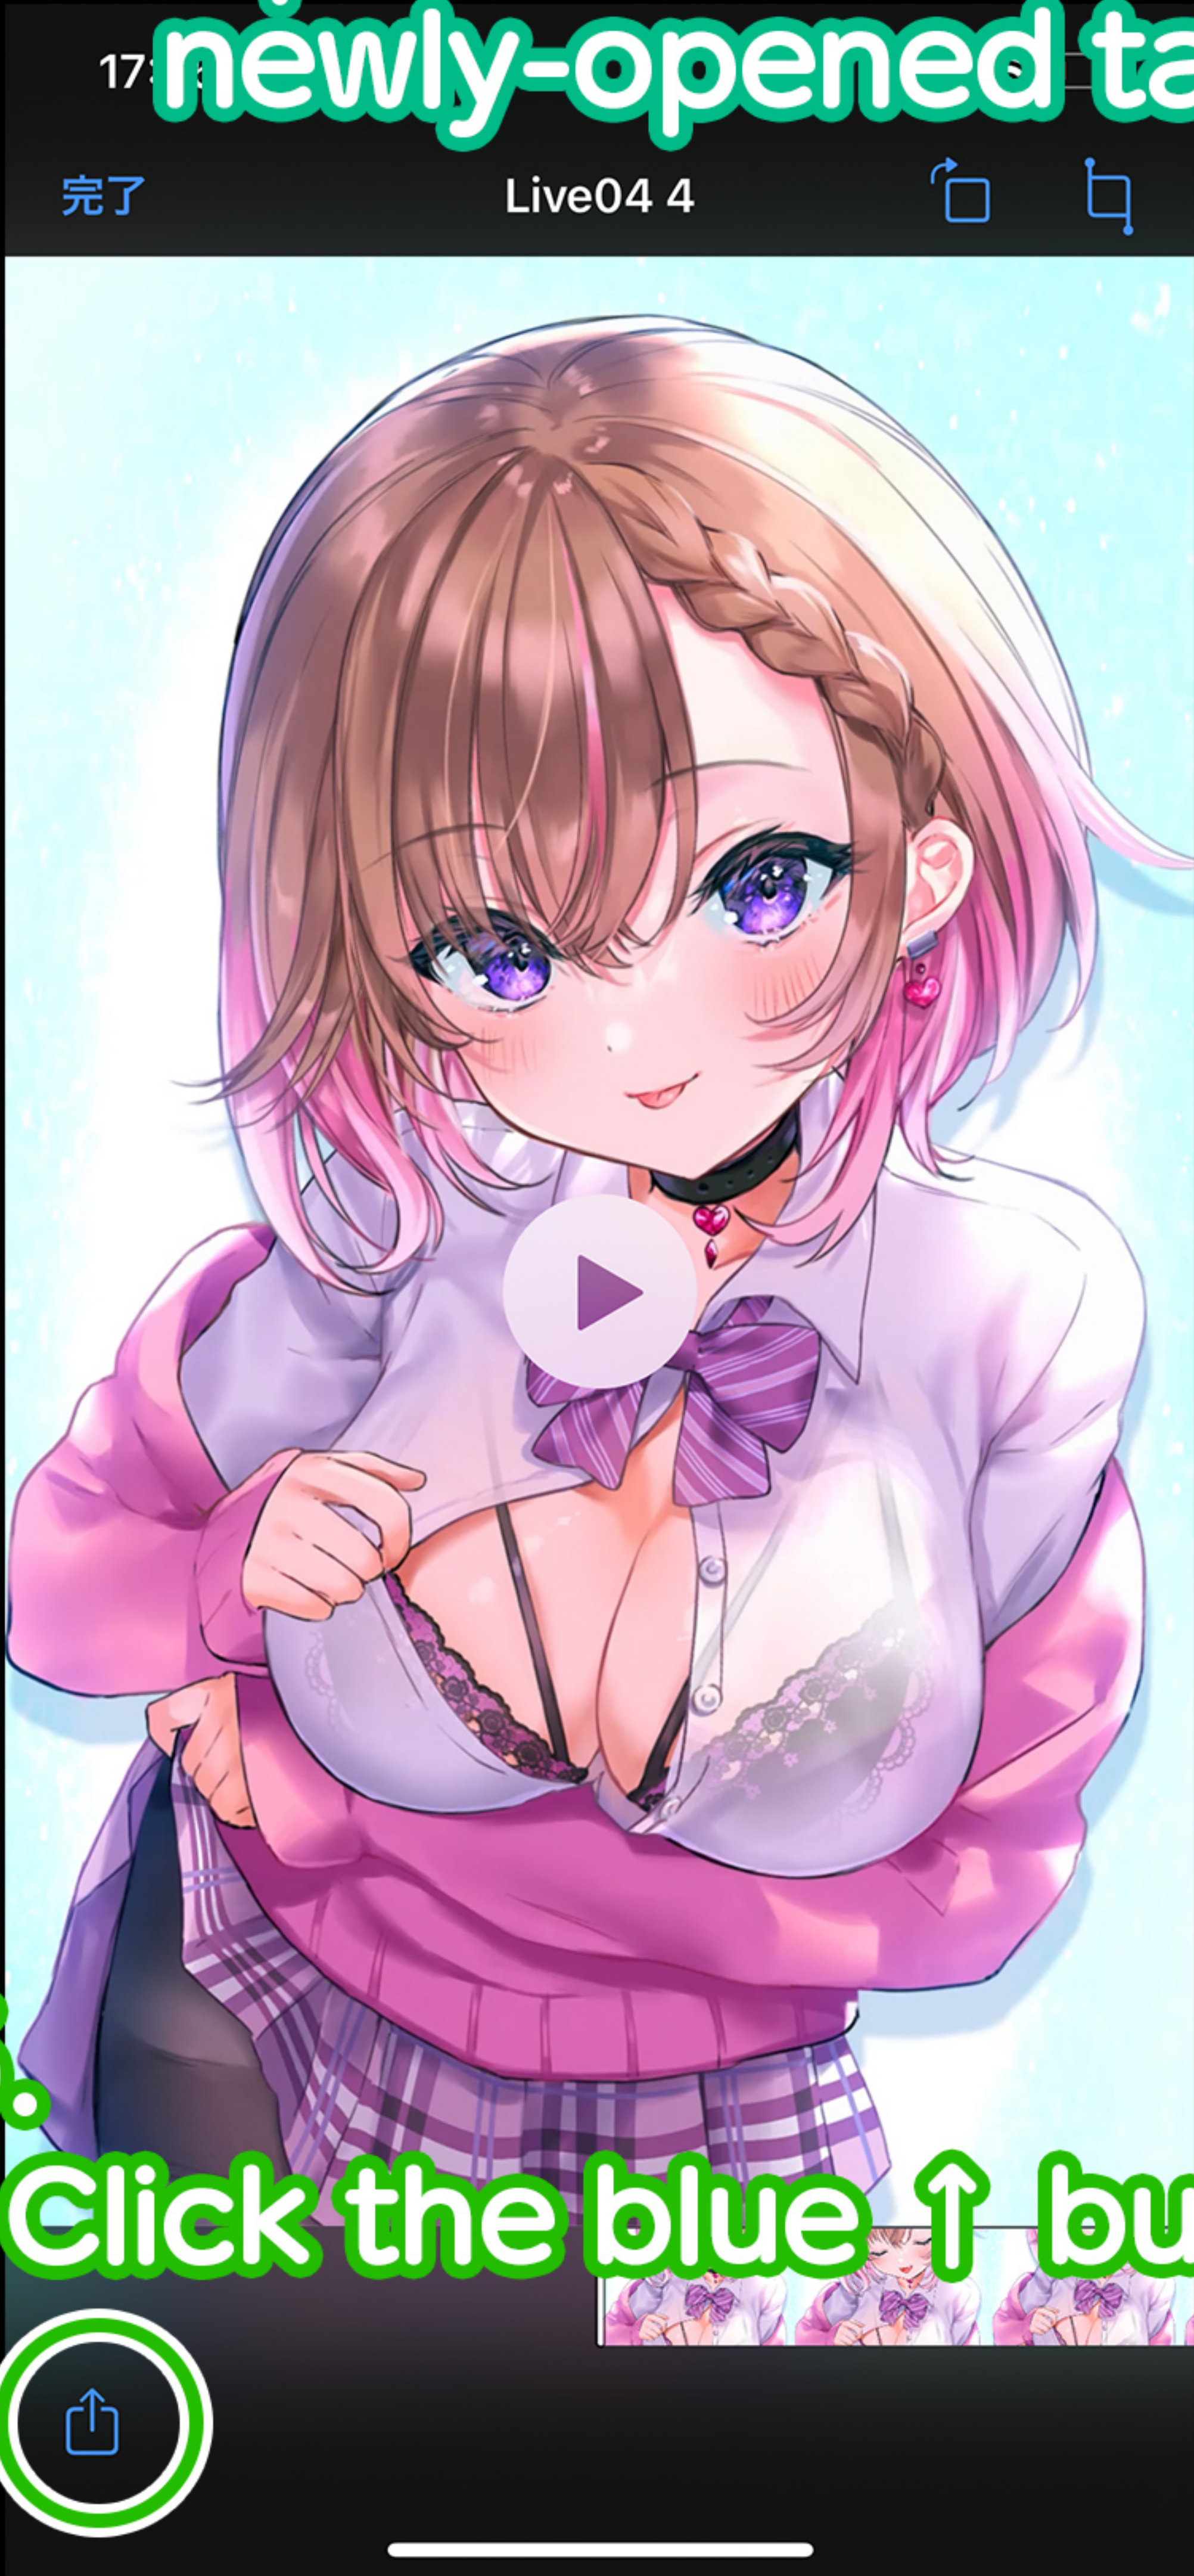

3. Click the download button in the middle of the screen.

4. Click the blue ↓ button that appears in the top right.

5. Open the video via the thumbnail in the newly-opened tab.

6. Click the blue ↑ button that appears in the bottom left.

1) Transferring Live Photo data to intoLive

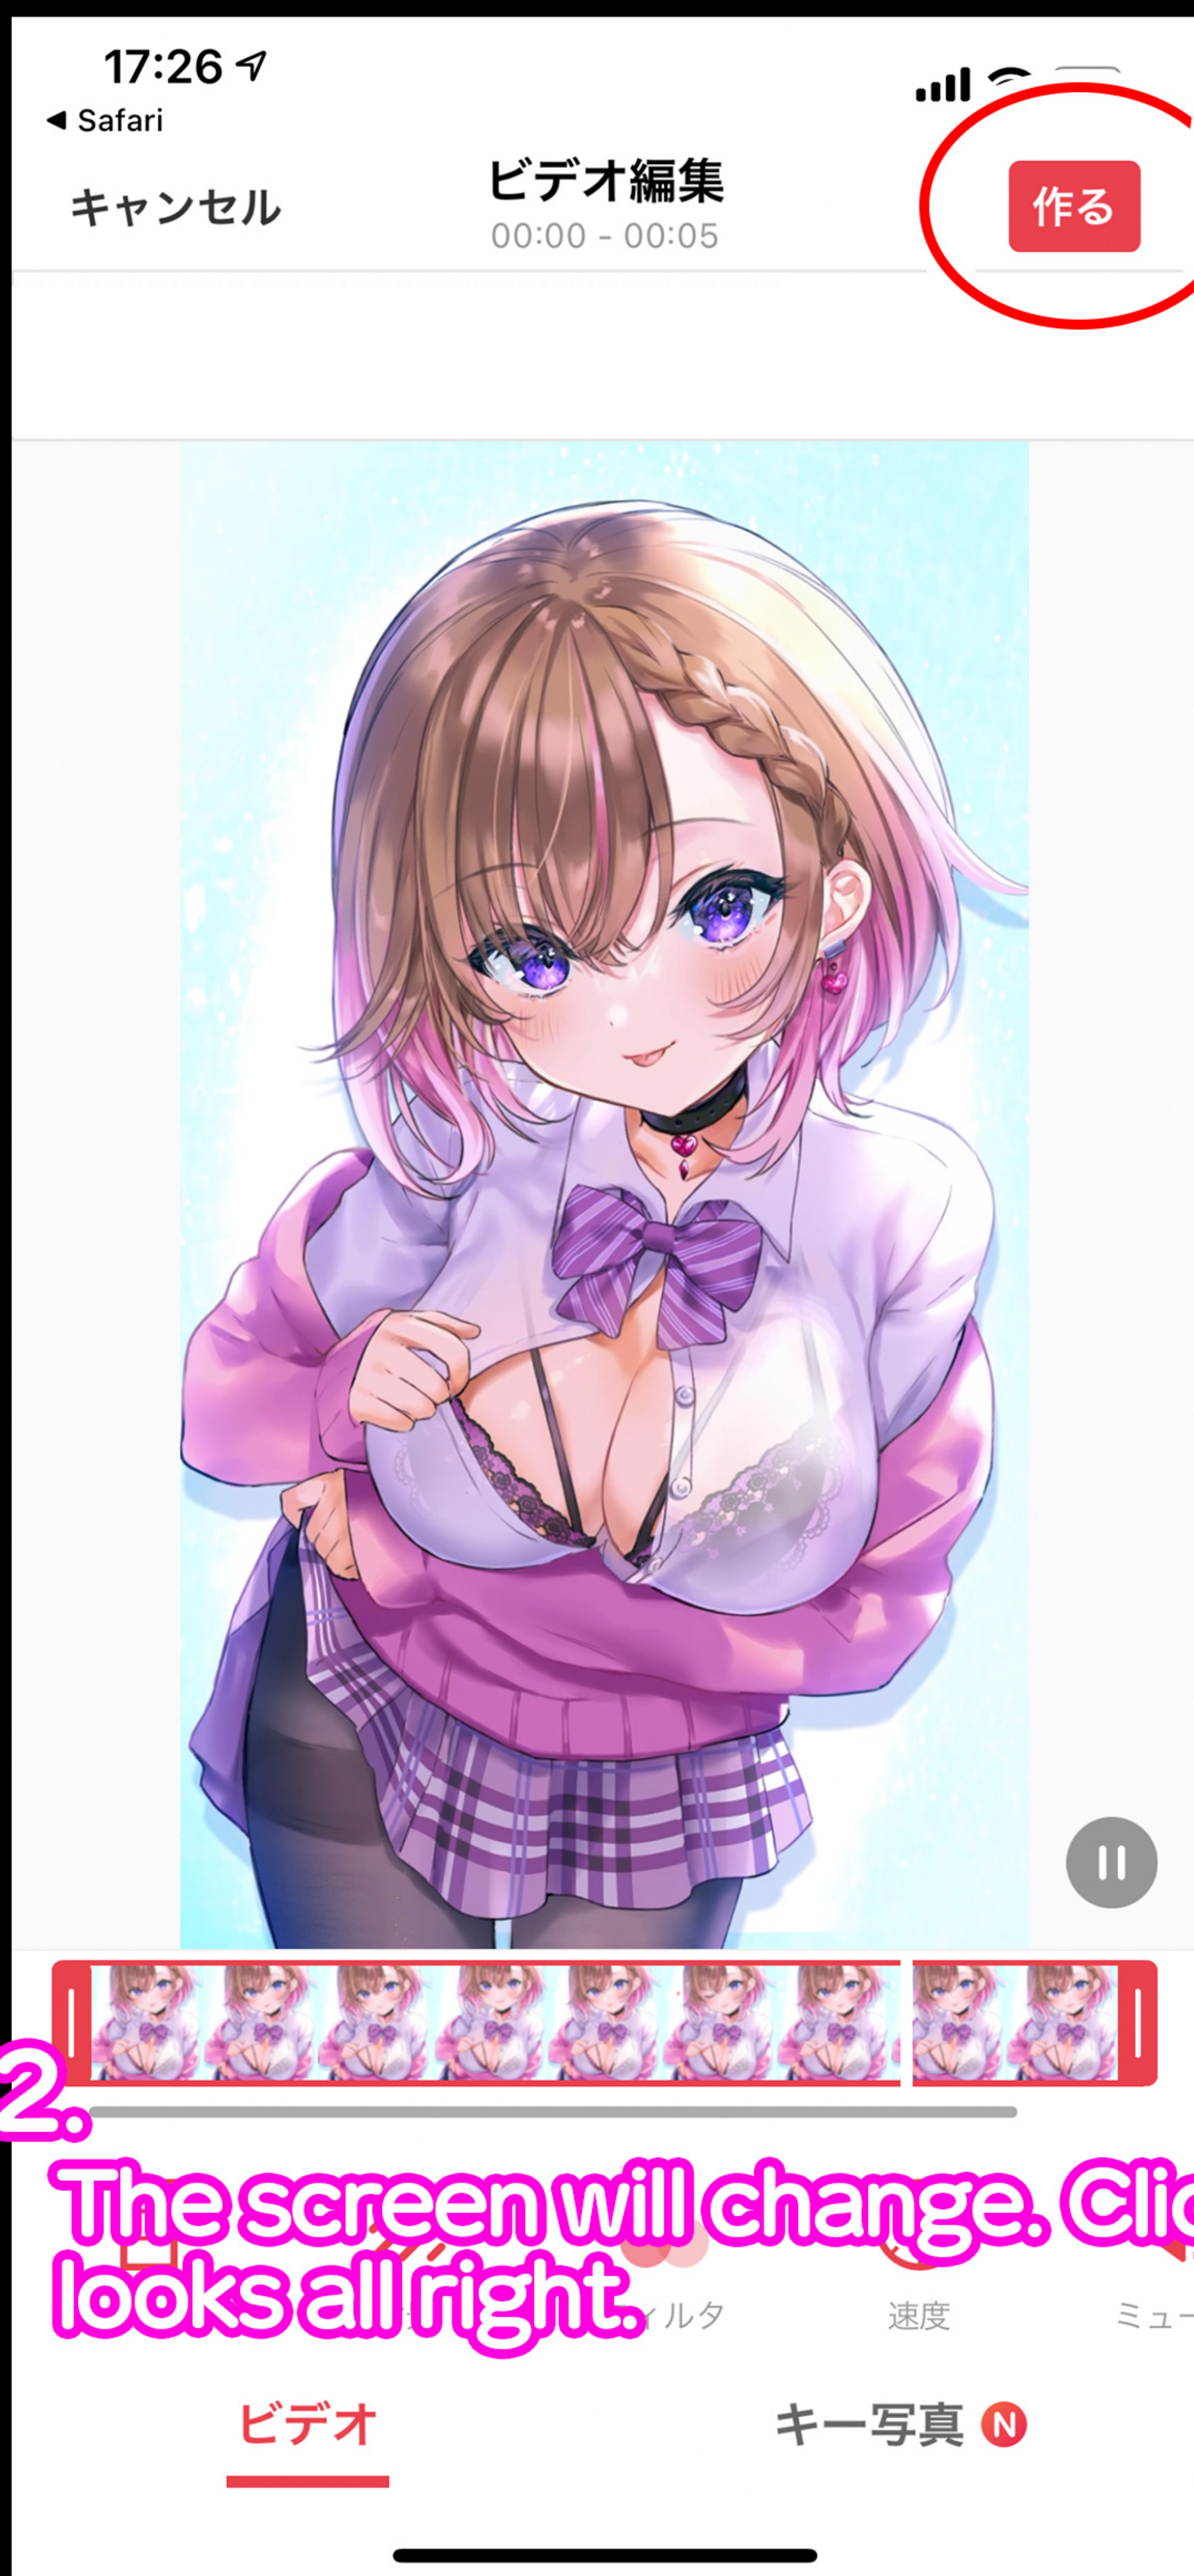

7.

Choose intoLive as the app to transfer the data to.

2) Using Live Photo data with intoLive

1. Open intoLive once the data has transferred, then click the button in the upper right.

2. The screen will change. Click the red button if everything looks all right.

3. Lastly, go to your iPhone's settings, then "wallpapers" and select the wallpaper you just made.
