

The contents of this folder are

English translation of the script of the sound work MP4 video with subtitles  
and corresponding

music player compatible

The script timeline corresponds to the lyric&SRT file

After downloading, place the original audio file in the agreed folder and use  
the player to play it to match the playback.

The translation of the script and subtitles is based on the original  
translation of the script before the dubbing. There may be a small difference  
in the content after the dubbing, but please forgive me if it does not affect  
the plot.

It is not easy to make works. If you like it, I hope everyone supports us on  
DLsite so that we can produce more works that everyone likes in the future  
and support English

thanks.
